

**FULLERTON**  
(UK) LTD

**INTRODUCES TOOLS FOR  
INTERNAL MACHINING**

## DIETERLE Specialist "Sliding Head" Tooling

TOOLS FOR AUTOMATIC LATHES

TOOLS FOR INTERNAL MACHINES

TOOLS FOR MEDICAL TECHNOLOGY

### SYSTEM SSXA

Three different sizes for all turning applications. Special cutting edges for materials producing long chips.

### SYSTEM SSXC

Especially stable inserts for large cutting depths.

### SYSTEM LWP

Cost efficient long turning insert with three cutting edges. Cutting radius: 0mm, 0.2mm and 0.4mm.

### TOOLING SYSTEM MFE

For internal machining. All tool holders are available in common diameters and with internal coolant channels. Well fixed cutting inserts cope with all machine problems.

### CHURCHILL

Complete solution for part - off tooling (Previously known as Churchill part - off system)

### PLASTIC MACHINING

Universal system for Plastic Machining.

### PROFILE BROACH/PUNCH

Out of HSS or solid carbide from 0.7mm diameter or Torx-T4 upward

Call Fullerton UK on **01484 665 489 / 660 626** or email **info@fullerton-uk.com** to place your order today!

**DIETERLE  
Specialist "Sliding  
Head" Tooling**

TOOLS FOR AUTOMATIC LATHES

TOOLS FOR INTERNAL MACHINES

TOOLS FOR MEDICAL TECHNOLOGY

**ROTOWIBEX  
FOR EXTERNAL THREADS**

Dieterle has created the tool Rotowibex for the serial production of threads for screws made out of titanium or similar materials for use in medical and implant technologies.

Rotowibex is a tool fitting for at least 6 or more inserts ground according to the thread profile.

For all common types of turning lathes Rotowibex is available from stock.

**MINIWIBEX TREAD MILLING CUTTERS  
FOR INTERNAL THREADS**

In the medical and dental sectors problems can occur due to materials producing long chips. Short chips are demanded which cannot be realised for example by taps due to system - inherent reasons. Therefore internal threads for implants and similar applications are milled with very high speed units. We stock our Miniwibex tool system for threads M0.7 to M10.

Our flexible production can also provide you with special dimensions and respond to any special requests.

**ECOSTAR LINE**

Specialist tools for Sliding Head/  
Swiss Auto Machines.
